Product Instructions

1. NS2 Operation Mode
Plug the controller directly into the NS2 console; the power indicator will stay solid blue to indicate successful connection.
2. Turbo Function Operation
 - a. Hold down the RGB/TURBO key, then press one action button once. The TURBO indicator flashes twice rapidly with a 0.5-second vibration, activating semi-automatic burst fire mode.
 - b. Hold down the RGB/TURBO key, then press the programmed action button twice. The TURBO indicator flashes quickly followed by a 0.5-second vibration to enable automatic continuous fire mode. Press the assigned action button to pause auto burst fire.
 - c. Hold down the RGB/TURBO key, then press the programmed action button three times. The TURBO light turns off accompanied by a 0.5-second vibration, meaning the turbo function has been successfully cancelled.
 - d. Assignable buttons include A/B/X/Y/L1/L2/R1/R2. The TURBO LED flashes in sync with the firing frequency when triggered.
3. GL & GR Button Mapping Function
During gameplay: Hold the HOME key $\rightarrow$ toggle to GL/GR mode $\rightarrow$ press the target action button to complete mapping.
4. RGB Lighting Control
Short press the RGB/TURBO key to turn the joystick RGB lighting on or off.
5. Other Functions
All other function buttons are identical to the official NS2 Pro controller.
6. Firmware Upgrade Note
If the controller becomes inoperable due to force majeure such as official system firmware updates, the issue can be fixed by upgrading the controller firmware via the PC upgrade package.

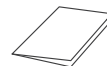

Notes

1. Do not store this product in humid or high-temperature environments.
2. Do not knock, drop, puncture or attempt to disassemble the product to avoid unnecessary damage.
3. Unauthorized disassembly by non-professional personnel will void the after-sales warranty service.
